Education

Grinnell College Aug 2024 - May 2028
Bachelor Computer Science *Grinnell, Iowa*

Core Skills

Programming Languages: C, Python, Java, Luau, JavaScript/TypeScript
Frameworks: Node.js, Next.js, React, Express, Tailwind CSS, Claude Code
Tools: RAG, MCP, Agent Loops, Linux, Git, MongoDB, RESTful APIs, PostgreSQL, Prisma
Languages spoken: English, French, Arabic

Work Experience

Software Engineer Intern Jun 2026 - Jul 2026
DXC Technology *Sale, Morocco*

- Architect a full-stack document management platform with AI semantic search (pgvector), versioned file storage on Cloudflare R2, and role-based access control.
- Implement Keycloak SSO with Authorization Code Flow, federated Google OAuth, and JWKS-based JWT verification; containerized the full stack with Docker Compose including automated schema migrations.

Lead Programmer (part-time) Jan 2026 – Present
Roblox (Independent Studio) *Remote*

- Design and implement gameplay systems in Luau across multiple live experiences, coordinating with a mid-size team through code reviews and Agile ticketing.
- Debug and port existing systems into new experiences, maintaining consistency across a codebase serving 1,150 MAU and 25,000+ total player visits.

Projects & Activities

Persona-driven Discord agent with tool-augmented RAG pipeline | *Node.js · discord.js · pgvector · MCP*

- Built a 4-class intent router and evaluation harness for a Discord agent, improving routing accuracy from 59% to 93% on production-log cases.
- Added provider-agnostic LLM failover across Ollama, Groq, and Gemini with budget-aware persistence and MCP tool integration for Brave Search.

Nutritional assistant & meal planner (HackPrinceton Fall 2025 Submission) | *Next.js, Express.js, MongoDB Atlas*

- Analyzed SKU-level transaction data to develop an algorithm for generating highly personalized user meal suggestions.
- Leveraged Google's Gemini API to parse grocery data & power a conversational meal-planning assistant.

Online Password Manager SPA | *React.js, Express.js, MongoDB Atlas*

- Secured sensitive user data by implementing industry-standard AES 256-bit encryption and master password authentication.
- Leveraged MongoDB and RESTful APIs to manage backend data securely and efficiently; Front-end built on React.js.

Certificates

Applications of AI Engineering (June-Aug 2026) | *Codepath*

- Build end-to-end AI systems: RAG pipelines, multi-tool agents, safety guardrails, and content classifiers.
- Navigate and debug unfamiliar codebases using structured exploration and AI-assisted techniques.

FreeCodeCamp | *Back End Development and APIs · Front End Development Libraries*
